Clorexyderm® Spot Gel

Clorexyderm Spot Gel is an antibacterial / antifungal soothing skin gel for dogs and cats containing chlorhexidine and Tris EDTA. It helps manage bacteria and yeast which can cause skin problems. Lanolin helps soothe itchy skin and reduce redness and irritation. The easy to apply gel forms a protective barrier on the surface of the skin and helps reduce contamination.

Ideal for skin folds, interdigital spaces, lip folds, localised skin areas and ear pinna. Clinically proven and Dermatologist recommended.

Composition:

- **Chlorhexidine digluconate** - antibacterial and anti-fungal action
- **Tris EDTA** - potentiating agent to enhance the activity of chlorhexidine
- **Glycerin**- Moisturising and soothing
- **Lanolin**- moisturising and soothing

How to use

- Apply directly to the skin
- Leave to dry
- Apply 2-3 times a day

Uses:

- Easy-to-use gel for the skin and folds
- Ideal for small or localised problems where antibiotic creams may not be necessary
- Can be applied in-between the paws after cleansing with CLX Wipes
- Helps form a second layer on the skin to protect from licking and other contaminants

Clinical Evidence
