How does EpiOtic® help?

“You may be advised to increase the frequency of ear cleaning”

EpiOtic® ear cleaner is pH neutral and therefore designed to be gentle, but still effective at removing unwanted wax and debris down the ear.

The special formulation also has a drying effect in the ear, so is ideal to use if your pet's ears have excessive moisture or after your pet has been playing in water or swimming.

In addition, EpiOtic® provides anti-adhesive glycotecnology, helping reduce the number of bacteria and yeast attached to the ear surface. EpiOtic® contains ingredients called monosaccharides (special sugars) that reduce the ability of microbial adhesion, and therefore helps in maintaining normal skin microbial balance.

How do I use EpiOtic®?

“EpiOtic® can
be used to
help maintain
a healthy
clean ear”

- 1 Turn the white nozzle to open. Place the nozzle in the entrance of the ear canal and squeeze a few drops in to the ear canal.
- 2 Distribute the cleaner in the ear canal by gently massaging the vertical canal. This may be felt as a large solid tube lying just under the skin below the entrance of the ear. Carefully massage for 10 to 20 seconds to ensure good cleansing of the vertical and horizontal ear canals.
- 3 Use a cotton ball or soft tissue to wipe any excess ear cleaner and dirt from the outside of the ear that has been dislodged by the EpiOtic®. Under no circumstances should you use a cotton bud to clean your pet's ear.

Repeat this process 1 to 3 times until the excess fluid no longer looks dirty. Now clean the other ear as required.

Maintain ear health using **EpiOtic®**

Easy to Use & Short Nozzles

- Available in 2 size bottles – 60ml & 125ml

Gentle & Soothing

- Neutral pH for optimal tolerance
- Alcohol and fragrance free
- For dogs, cats, kittens and puppies

Anti-odour

- Neutralises unpleasant smells

S-I-S Technology

- Contains Virbac's Defensin™ and Glycotechnology™ which reduces microbial adherence and helps to maintain the skin's natural microbial defence

Cleansing & Drying

- Enables the removal of dirt and excessive wax
